

Smart Door Lock System - Component List

Based on the provided circuit diagram and prototype.

S.No	Component	Quantity	Description
1	Arduino Nano	1	Main microcontroller
2	RFID RC522 Module	1	13.56 MHz RFID reader
3	RFID Cards/Tags	1-2	Authorized access cards
4	4x4 Matrix Keypad	1	Password input
5	16x2 LCD Display	1	Status display
6	PIR Motion Sensor	1	Motion detection
7	1-Channel Relay Module	1	Controls solenoid lock
8	12V Solenoid Door Lock	1	Electronic locking mechanism
9	Active Buzzer	1	Audio indication
10	Push Button	1	Exit/Open button
11	12V DC Power Adapter	1	Power supply
12	Breadboard/PCB	1	Circuit assembly
13	Jumper Wires	As required	Interconnections
14	Connecting Wires	As required	Power and signal wiring
15	Prototype Enclosure	1	Housing for project

Software Used

- Arduino IDE
- MFRC522 Library
- Keypad Library
- LiquidCrystal Library
